

**The Only Voice You Need....**

## **Conferencing Services**

**VoycEnterprises' partnership with Intercall allows us to provide our clients the best possible conferencing options in the world. Intercall is the largest dedicated conferencing service provider in the world.**

### **Reservationless-Plus Toll & Toll Free**

After setting up a Reservationless-Plus account, a dial-in number and unique passcode are provided to each moderator. No further reservations are necessary. Within 10 business days, each moderator will receive a plastic wallet card containing account-specific information, including the dial-in number, moderator passcode, participants passcode and moderator's name. This card makes conferencing any time, from anywhere, even easier.

### **Automated Meet Me Toll & Toll Free**

For clients who prefer a new dial-in number and passcode for each conference conducted, Automated Meet Me is available. A new reservation is required for each conference or series. However, this product is incredibly flexible to customers who want to extend the call and/or add more users. Intercall WILL NOT stop the call at the end of a reservation slot, or any other time. The moderator has full control of the call time, call size, and call features as well.

### **Operator Assisted Toll & Toll Free**

Operator Assisted is a reservation-based service that offers customers audio conferencing service 24 hours a day, 7 days a week, with the personal assistance of an operator and support personnel who manage high-touch features. Operator Assisted offers a full-range of features.

### **Direct Event Toll & Toll-Free**

Direct Event offers the customization of a large-scale event call with the convenience of automated conferencing. Participants join your conference call by entering a passcode, eliminating the need for an operator to connect them to your event. By streamlining the process and reducing hold times, Direct Event offers the fastest way to join an event conference.
