

# The Only Voice You Need....

**VoycEnterprises offers switched and dedicated Long Distance telephone services over quality, reliable networks to business and residential clients. All with a significant savings and seamless switching! During your FREE consultation, our representative will help you determine the level of service your business requires.**

## Long Distance Services

### Switched

The regular long distance POTS lines go through the local carrier and are then routed to the long distance carrier.

### Dedicated

The long distance line is dedicated between the carrier and the client. The calls are routed from the client to the long distance carrier omitting the local carrier.

### Toll Free Numbers

Toll free numbers allow your customers to call your organization free of charge to your customer. There are many features available with toll free numbers; time of day routing, by location, and area code blocking, just to name a few.

### Calling Cards

Calling cards are perfect for Sales People, and business travelers and can be used domestically or internationally. Calling card calls can originate in the US and terminate abroad, or originate abroad and terminate in the US.

### Account Codes

A useful tool for tracking long distance usage for employees, departments, and clients. Generally 2 to 8 digits are assigned per employee / department / client. Charges are sorted and itemized on your monthly invoice.

All with a significant savings and seamless switching!
